

Methow Restoration Council
June 15, 2020

Hello MRC Participants,

There will be no MRC call tomorrow, as the only topic for the meeting was an update from UCSRB and a review of the HWS/SRP spreadsheet for final QAQC, Pete and I agreed that these topics could be done via email. The project spreadsheet is attached for your review. Please look over the projects on the list and make sure that your projects are included and updated. It is especially important to make sure that projects finished in 2019 are included and have all of the information.

UCSRB June 2020 Updates and Information:

- **HWS/SRP**

Review the attached project spreadsheet and update any project status in SRP (HWS). The tab on the right at the bottom lists all the projects completed in 2019, if something is missing notify Pete (pete.teigen@ucsrb.org), also let him know if you have questions and/or need help.

- **Planned Project Forecast List**

please let Pete know if you are going to be submitting any projects for SRFB funding consideration in either 2021 or 2022 grant round by Friday, June 19.

- **2021 Salmon Recovery Conference**

Planning has begun for the 2021 Salmon Recovery Conference. It will be April 27-28, 2021 in Vancouver Washington. Please provide us with your ideas for sessions for the conference. The call for sessions can be found [here](#)

The meeting notes from the May MRC call are attached. Please review and notify me of any important errors or omissions. My apologies if I missed anyone in the participant list; I have been missing my trusty meeting sign-in sheet!
